Sample Information

Lab Use Only	Full Name	Date of Birth	Sex	Ethnicity (Optional):	Consent Signature (see consent statement below)	Date Collected
		Mo./Day Year	M F			Mo./Day Year

Have any of the individuals sampled received a stem cell transplant (blood, bone marrow or cord blood)? **YES NO**

Specimen Collection Instructions

1. Carefully and clearly fill out the information on this form. RACE/ETHNICITY is optional. Put your name on this form and sign and date it the day you collect your specimens.
2. Open the packets containing two swabs each and remove only one swab.
3. Aggressively rub and twirl the swab tip on the inside of your cheek at least 20 times (about 30 seconds).
4. Place the used swab directly into the DNA Sample Envelope, head first. Repeat the collection process with the remaining swabs, being sure to use two swabs on one cheek and two on the other. Print and sign your name and seal the DNA Sample Envelope with the four swabs enclosed. Place the samples and this form in the self-addressed stamped envelope and mail to Chromosomal Laboratories.

CONSENT STATEMENT

I affirm that I understand the following statements and consent to the following conditions as represented by my signature above:

I authorize DNA Consultants and its Laboratory, Chromosomal Laboratories, Inc., to collect a biological specimen from me or from an individual for whom I have the legal right to authorize a collection. I authorize the Laboratory to perform DNA testing on that specimen for the purpose of genetic identification, relationship, ethnicity, or genealogical determination. If this test is for a minor or person who is incapable of giving consent, I attest that I have the legal authority to consent for the collection and DNA testing of the biological specimen of that person. I hereby release DNA Consultants and the Laboratory from any liability. I assume all legal responsibility for the collection of the specimen, testing, and any or all effects resulting from this test.

I understand by returning my sample that I am reconfirming my order, and that no refund can be given for work thereafter performed.

I understand that these results may or may not provide conclusive evidence for ancestry or a biological relationship. I expressly understand that, as with any testing, the Laboratory cannot guarantee the outcome of the test, or the probability of the test result. I also understand that in very rare occasions, testing results are inconclusive. I understand that to provide me with the highest quality of testing, when necessary, the Laboratory director(s) reserve the right to perform more testing or other Laboratory procedures to satisfy Laboratory guidelines and standards. This process may delay the release date of the final report. If the biological sample is inadequate for evaluation for any reason, DNA Consultants and the Laboratory, reserves the right to request additional samples. DNA Consultants and the Laboratory shall not be liable for the inability to produce a result due to insufficient sample(s) or due to the nature of the biological specimen.

I expressly understand that DNA testing is highly accurate but that there is always a possibility of error or omission. I acknowledge and accept that the limit of liability for DNA Consultants or the Laboratory shall not exceed the value of this test. I expressly agree to hold DNA Consultants and the Laboratory blameless for any action that may occur as a result of the outcome of this test. These DNA test results are being obtained completely for my personal information, and DNA Testing and the Laboratory are not guaranteeing that these results will be admissible as evidence in a court of law.

I understand that by providing my ethnic description I am only assisting the Laboratory with improving the calculated probabilities of my results. I further understand that my personal information will not be sold to or shared with any other companies. I understand that the Laboratory will store my DNA specimens for up to six (6) months and raw score results for a period of at least five (5) year or seven (7) years for New York samples, unless otherwise directed.
